17 January 2022

Dear Customers,

VICT Industry Notice

Effective 1 February 2022, customers are advised that VICT will implement a temporary COVID recovery tariff of \$3.97 (subject to GST) per container.

VICT are committed to providing a safe working environment for our employees and visitors, which is why we've implemented Rapid Antigen Testing since mid-November 2021. This has been applied to anyone who enters the terminal, safeguarding our workers, while ensuring we continue to keep the terminal working and the vital Victorian supply chain moving.

To further ensure the supply chain continues to support the economy, as of last week, we've removed the landside stoppages between shift changeovers and commenced continuous operations for landside operators.

Throughout the last two years of the pandemic, VICT has absorbed the cost of additional COVID requirements but due to the latest outbreak and overall increase in costs especially relating to Rapid Antigen Tests, we have no option but to apply a temporary tariff to recover some of the extraordinary costs.

The temporary COVID tariff will be applied to our landside tariffs and added to each container transaction via our Vehicle Booking System as part of the weekly billing cycle.

VICT are full supporters of the Victorian Department of Transport Voluntary Pricing for Stevedore Landside Charges but under these particular circumstances, we are not in a position to provide the normal 60 and 30 day notice as per our normal known charges.

VICT are committed to monitor the on-going costs and provide regular updates regarding the temporary COVID recovery tariff.

For further feedback, please e-mail customer@vict.com.au.

Yours truly,

Patrick Chan
Chief Commercial Officer
Victoria International Container Terminal Limited
