30 April 2021

Dear Customers,

VICT Industry Notice (Infrastructure Charge)

Effective 1 July 2021, VICT will be adjusting our Infrastructure Charge to recover our increased infrastructure cost and landside system investments to be able to continue and provide high level of service for our customers.

The revised charge is a direct-pass through to our customers to recover the on-going costs, the revised Infrastructure charge will be \$141.80 (exclusive of GST) per container and will only be applicable to full export and import containers.

Throughout the last 12 months, VICT continues to deliver for our landside customers an average of sub 35-minute gate to gate truck turn time.

VICT are proud participants of the Victorian State Governments Victorian Voluntary Pricing Protocol (VPP) and invites all parties to submit their enquiries related to the adjusted Infrastructure Charge to customer@vict.com.au.

Feedback and further comments will be shared directly with the Department of Transport (DoT).

Yours truly,

Patrick Chan
Chief Commercial Officer
Victoria International Container Terminal Limited
